Assessment Questions

1

In the context of machine learning, when dealing with environments that have complex and unpredictable dynamics, which type of algorithms are most suitable?

[1 mark | Applying | medium]

In the context of machine learning, when dealing with environments that have complex and unpredictable dynamics, which type of algorithms are most suitable?

2

In the context of machine learning with complex dynamics, which algorithm is best suited to learn policies directly from high-dimensional sensory inputs?

[1 mark | Applying | medium]

In the context of machine learning with complex dynamics, which algorithm is best suited to learn policies directly from high-dimensional sensory inputs?
